first reject also fails passes n/a o pre-registered target (coincides with the first reject on all 30)

no forgery is FIRST caught by V2 (each fails only inside the $-\nu$ / dangling- ν cascades) · V6b prior-guard clause: 0 of 11 V6b failures
declared boundary: a PARTIALLY omitted DB blocking set (non-empty, all registered) is not rejected — only emptied (F4f) or alien (F4g) sets are
